# Kyocera Cloud Print and Scan

Manage the costs of your print environment and ensure the security of your documents with our native cloud solution.

Kyocera Cloud Print and Scan

Kyocera's native cloud print management tool allows you to better understand and manage your company's printing costs. Kyocera Cloud Print and Scan (KCPS) increases the flexibility and features of your print environment and removes the costs of on-site servers by managing your Kyocera devices in the Cloud.

By moving your print server to the Cloud, you reduce the costs associated with having an on-premise server. At the same time, you will be providing your business with the perfect solution when it comes to increased document security and management of print costs. KCPS also reduces your operational costs by using a high-class, multi-tenant architecture hosted in the Cloud with Amazon Web Services (AWS). Thanks to the embedded Print&Follow (TM) function, the documents sent to the cloud can be securely released at any registered device. Full functionality of the Kyocera KX Driver is supported.

Your potential business challenges

Cost - My current on-premise print management solution involves high infrastructure and operational costs.

Security - Moving my business to the cloud could be potentially harmed by the theft of confidential data.

Inefficiency - If my document storage is in the Cloud, there won't be easy accessibility for employees.

Sustainability - To ensure that my business meets its sustainability goals, I will always be looking for new methods to reduce CO_2 emissions.
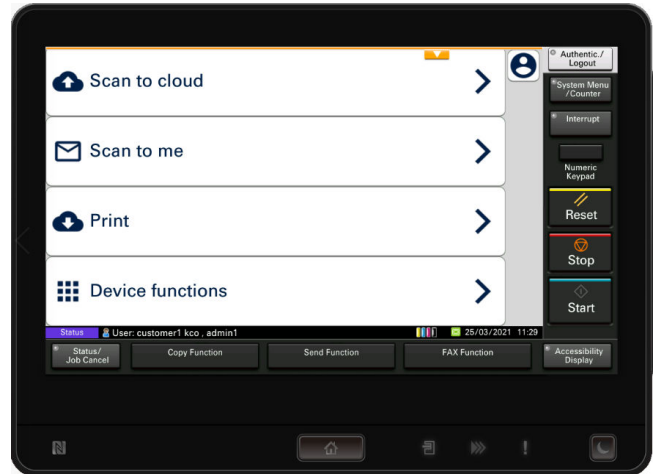

Kyocera offered solutions

Cost Reduction - By using KCPS, you are only paying for the service (SaaS) and no other initial investment is needed.

Enhanced security - Using the Local Spooling function, print jobs stay within a customer's network and can be released from any device - only metadata will be stored in the Cloud.

Improved productivity - KCPS allows printing from and scanning directly to your cloud and mobile printing via Kyocera Mobile Print app for iOS and Android.

Minimized waste - Centralized and consolidated hosting services leads to a reduced carbon footprint that is generated by your company.

Kyocera offered solutions

Create policies and allocate them to different user groups to reduce print cost in your business. For example, within your organization, establish default settings such as black and white only for Finance and color print for Marketing. Moreover, quotas can be implemented in order to have optimal cost management for a group of employees, for a specific department or considering the organization as a whole.

The embedded KCPS HyPAS app is intuitive and easy to use. There are multiple options for secure authentication such as with an RFID card, PIN code, or username and password.

Key Features & Specifications

Multi-tenant software - Reduce your operational costs using the multi-tenant software hosted in the cloud with Amazon Web Services (AWS).

Multiple scan options - Scan documents to users' email and to KCPS server in the cloud.

Security - Job release only after user authentication with ID card, PIN code, or user name and password. Azure Active Directory integration supported.

3rd party Cloud storage integration - Print from, scan to, and forward faxes to connected 3rd party cloud storage: SharePoint Online, OneDrive™, Google Drive™, Box.com™, and Box Enterprise.

Print Quota - Assign and manage print quotas to a group of users in order to reduce your total print cost.

Print policies - Assign the desired print policies to a group of users in order to improve their print behavior and optimize print cost management.
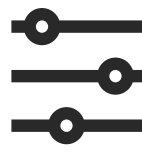

Actionable Reporting - Variety of reports guiding you to take the right decision in managing your business.

Local spooling - The job can be released from any Kyocera HyPAS device within the customer network.

Copy Function - The users can benefit from the copy function of the device, and this will still be counted within their print quota (the user stays within their print limit).

System Requirements - Client Operating System: Windows 8 or later MacOS 10.13 or later Browser support: Chrome, Safari and Edge.

Kyocera Document Solutions has championed innovative technology since 1934. We enable our customers to turn information into knowledge, excel at learning and surpass others. With professional expertise and a culture of empathetic partnership, we help organizations put knowledge to work to drive change.
